

# CHRIS CHRISTIE

**Jeopardizing Health Care.** Christie proposes to allow health insurance companies to offer “mandate-free,” bare-bones plans that leave consumers at risk if they get sick or hurt. These plans would attract only younger, healthier workers, increasing premiums for older workers who need health care the most. ([www.christiefornj.com](http://www.christiefornj.com), accessed 4/15/09)

**Opposing Workers' Rights.** Christie spoke out against Gov. Jon Corzine for supporting paid family leave, requiring prevailing wages on state projects and giving workers the freedom to choose a union through majority sign-up. Christie wants to eliminate rules and regulations designed to protect employees' rights. (Philadelphia Inquirer, 4/13/09; [www.christiefornj.com](http://www.christiefornj.com), accessed 4/15/09)

**Failing Working Families.** Christie's policies put employers, not working families, first. With a plan that weakens regulations on businesses and reduces the protections workers have on the job, Christie's policies will put our economy at further risk and leave middle-class families behind.
